

Physical Therapist Centralized Application Service

COURSE PREREQUISITES SUMMARY

2011-12 Admissions Cycle

2011-12 COURSE PREREQUISITES SUMMARY

EXECUTIVE SUMMARY

The Course Prerequisites Summary for programs participating in the Physical Therapist Centralized Application Service (PTCAS) was released by the American Physical Therapy Association (APTA) in August 2011.

There are 146 physical therapist (PT) education programs participating in PTCAS during the 2011-12 admissions cycle. Percents below only reflect the 144 programs that provided course prerequisite data for the PTCAS Web site (www.ptcas.org) as of August 10, 2011. Percents were rounded to the nearest whole number and refer to both required and conditionally required courses.

Programs may change course prerequisites at any time and may have additional requirements, recommendations, or policies that are not reflected in this summary or on the PTCAS Web site. Programs may also allow applicants to substitute courses or choose different prerequisite tracks. Applicants should contact programs directly to determine whether a particular course will fulfill a prerequisite.

ANATOMY AND/OR PHYSIOLOGY (A&P)

- **99%** require at least one course in anatomy or physiology
 - **1%** do not require a course in anatomy or physiology
-
- **89%** accept combined or separate A&P courses
 - **6%** only accept separate A&P courses (e.g., Anatomy, Physiology)
 - **5%** only accept combined A&P courses (e.g., Anatomy & Physiology I, Anatomy & Physiology II)

BIOLOGY

Programs may use different terminology to describe the same biology requirements. For instance, a single “a” under the “one year sequence of biology” column for one program may be the equivalent to “a,b” in the “biology / biological science” column for another program. Both categories were included in the table to accommodate different program policies. Programs commonly allow applicants to substitute a specialized biology course (e.g., cell biology) for a general biology (i.e., Biology I or II) requirement. The table does not distinguish between lower and upper division biology requirements.

- **83%** require one or more courses in biology or biological science
 - **17%** do not require a course in biology or biological science
-
- **29%** require a one-year sequence in biology (e.g., Biology I, Biology II) and no additional biology
 - **11%** require two courses in biology / biological science, but not necessarily in sequence
 - **35%** require only one course in biology or biological science
 - **8%** require more than two courses in biology or biological science

CHEMISTRY

- **99%** require one or more courses in chemistry
 - **1%** do not require a course in chemistry
-
- **94%** require a one-year sequence in chemistry
 - **4%** require a single chemistry course

PHYSICS

- **99%** require one or more courses in physics
 - **1%** do not require a course in physics
-

- **96%** require a one year sequence in physics
- **3%** require a single physics course

SOCIAL AND BEHAVIORAL SCIENCES

Applicants may be required to complete particular social and behavioral courses or may be permitted to complete any courses in the subject. Programs commonly allow applicants to substitute specialized psychology courses (e.g., Abnormal) for general psychology requirements.

- **95%** require one or more courses in social or behavioral science
 - **5%** do not require a course in social or behavioral science
-
- **65%** require one or more psychology courses only (and no other social or behavioral science)
 - **30%** require one or more social or behavioral science courses (but not explicitly in psychology)
-
- **12%** require a single course in psychology or other social and behavioral science
 - **61%** require two courses in psychology or other social and behavioral science
 - **22%** require more than two courses in psychology or other social and behavioral science

STATISTICS

- **97%** require a course in statistics
 - **3%** do not require a course in statistics
-

(Sub-categories below are not mutually exclusive)

- **83%** accept math statistics
- **79%** accept psychology statistics
- **65%** accept biostatistics
- **49%** accept business statistics
- **33%** accept any statistics course

MATH

- **26%** require one or more courses in math
 - **74%** do not require a course in math
-

(Sub-categories below are not mutually exclusive)

- **24%** accept calculus
- **20%** accept trigonometry
- **11%** accept algebra
- **10%** accept pre-calculus
- **6%** accept geometry
- **1%** accept any math course
